## Computer Science Engineering Student

+91-8072624996 @ velusamy21.work@gmail.com  
linkedin.com/in/velusamy--m Chennai

## SKILLS

Atom · Bootstrap · C/C++ · Core Java · CSS ·  
Cybersecurity · Eclipse · GitHub ·  
Google Firebase · HTML · IBM · Java ·  
JavaScript · JWT · Kali · Laravel · Linux ·  
MongoDB · OOP · PHP · Python · React ·  
Tailwind · Vercel · Visual Studio Code ·  
Bootstrap 5 · Node.js · Express.js · Gmail ·  
Kali Linux

## EXPERIENCE

### Summer Intern

#### RETECH SOLUTION

05/2023 - 06/2023 Tambaram, Chennai

Summer internship focusing on full-stack development

- Built a Library Management System during the internship, incorporating advanced database management and connectivity to handle 500+ user records efficiently
- Designed and deployed a responsive user interface, enhancing accessibility across devices and reducing system response time by 30%

### Summer Intern

#### PUMO TECHNOVATION

07/2023 - 08/2023 Velachery, Chennai

Summer internship focusing on Core Java development

- Mastered Core Java concepts, including object-oriented programming (OOP), exception handling, and file I/O, successfully implementing these principles in 3+ database-driven applications
- Gained hands-on experience in database integration and Java-based web development, improving system efficiency and reducing errors by 20% during development tasks

## SUMMARY

I am a Computer Science Engineering student with hands-on experience in full-stack development. I am skilled in building scalable and responsive web applications, integrating robust database management, backend APIs, and intuitive UI designs. I have demonstrated the ability to solve complex problems and implement practical solutions through academic projects and industry internships. I am eager to contribute my technical expertise in a collaborative, forward-thinking environment

## EDUCATION

Bachelor of Engineering in Computer Science and Engineering 10/2021 - 05/2025

Madha Engineering College

Kundrathur, Chennai

## PROJECTS

### ATM CONSOLE APPLICATION

ATM Console Application built with Python and MySQL

- Implemented a secure login system, enabling 50+ users to access account balances and perform transactions seamlessly
- Developed deposit, withdrawal, and transfer functionalities, improving transaction efficiency by 40%

### RESPONSIVE PORTFOLIO WEBSITE

Responsive Portfolio Website built with React, Tailwind, CSS, and Framer Motion

- Built a portfolio website showcasing 3+ personal projects, skills, and achievements with visually engaging displays, increasing portfolio engagement by 40%
- Engineered and optimized a responsive interface, ensuring 100% cross-device compatibility and reducing bounce rates by 30%
- Innovated content management features for seamless updates, improving efficiency by 50% in project data modifications

### COFFEE SHOP WEBSITE

Coffee Shop Website built with HTML, CSS, JS, Bootstrap, PHP, and MySQL

- Engineered coffee shop website, facilitating secure user registration and login, with a user database crafted to handle 100+ user records efficiently
- Constructed an interactive interface showcasing 50+ products with detailed descriptions and categories for easier navigation
- Executed a responsive design for smooth usability across devices, increasing mobile compatibility by 30%
- Refined the system to manage user data and product inventory, ensuring data accuracy and consistency with zero downtime

### ONLINE BOOKING SYSTEM CONSOLE APPLICATION

Online Booking System Console Application built with Java and MySQL

- Formulated a ticket booking system as a Java console application with MySQL database integration, handling 50+ ticket bookings efficiently
- Optimized database queries, reducing booking time by 40% for improved user experience
- Automated PDF generation for booked tickets, streamlining documentation and increasing system efficiency by 50%
- Applied admin functionalities, simplifying movie and user management, reducing manual workload by 35%

## PROJECTS

---

### BLOG WEBSITE

Blog Website built with MERN stack, JWT, Cloudinary, and Framer Motion

- Established a full-stack blog platform enabling CRUD operations with JWT authentication
- Enforced Cloudinary for seamless image uploads and storage
- Crafted a responsive UI for optimal accessibility across all devices
- Refined user experience with Framer Motion animations and smooth transitions
- Streamlined authorization flows and secure session management to improve efficiency
- Upgraded backend queries, boosting system performance by 40%
